PLATFORM

convertLogic platform moves schematics, blueprints, CAD Files—your creations—across your team with one-step ease. It's communication at its most efficient. We support your 2D designs, and a model-based design approach with our 3D PDF capabilities. Qore8 energizes data portability of any file with point-and-click simplicity. We empower you to implement the right layer of compliance at the right time, with the right approvals—all within your PLM system.

convertLogic creates a universe of choice.

Simple to use
• Out-of-the-box integration
• Point-and-click interface
• Fast and reliable
• Workhorse design
• Supports all versions

Standard features
• Convert any file type
• PDF/A formats
• OCR files
• Regulatory compliance tool
• Multi-document merging
• Dynamic stamping
• Digital signatures

Additional components
• CL 3D to support MBD approach
• Digital signature with certificate management
• Native file refresh
• CL BOM management application

Optimize communications

convertLogic is fully integrated with all versions of ENOVIA

Effective project management is as much about collaboration as it is knowledge, design and expertise.

Keeping the lines of communication open and the flow of data moving is central to any project lifecycle. **convertLogic** is the simplest bridge from working document to team distribution and collaboration.

Empowering digital transformation

CONVERT
L O G I C

**Move concept
to reality.**

convertLogic works with all
versions of ENOVIA and converts files
within 3DExperience according to
your file specification.

convertLogic.
You create it. We move it.

Fully integrated user interface
convertLogic lets you control ENOVIA inside a single,
easy-to-navigate panel.

It's a workhorse
Convert legacy data in bulk. Adding tools like Spinner
let you process thousands of documents at a time from
the **convertLogic** panel. Resend documents that don't
convert the first time. It's that simple.

What you want, when you want it
Simply select the target file type. **convertLogic** delivers
the best fidelity using the native application to process
any file.

convertLogic solid

CL 3D
Access detailed MBD data at any part of the process to facilitate rapid and seamless delivery. CL 3D collects product structure, PMI, and GD&T from your PLM/PDM and converts flawlessly to support downstream collaboration. Time-to-production is realized 40 percent sooner—achieved through higher quality—reducing errors and re-work.

Enhanced scalability
ConvertLogic's point-and-click interface means you can bring a new site online in minutes. Link your sites and process files from multiple sites, or add them as independent locations. Configuring **convertLogic** is as simple as clicking an option.

Native file refresh
Reduce engineering design time with an automated stamping process in batch mode, alleviating the need to update custom tables and fields within your native cad files.

Digital signature with certificate management
Having the right approvals, at the right time, in the right sequence, are pivotal to an organizations self-preservation. Put a guarantee on your designs by ensuring their authenticity. Discover our centralized platform that allows you to manage, deploy, and monitor your organizations certificates intuitively and effectively.
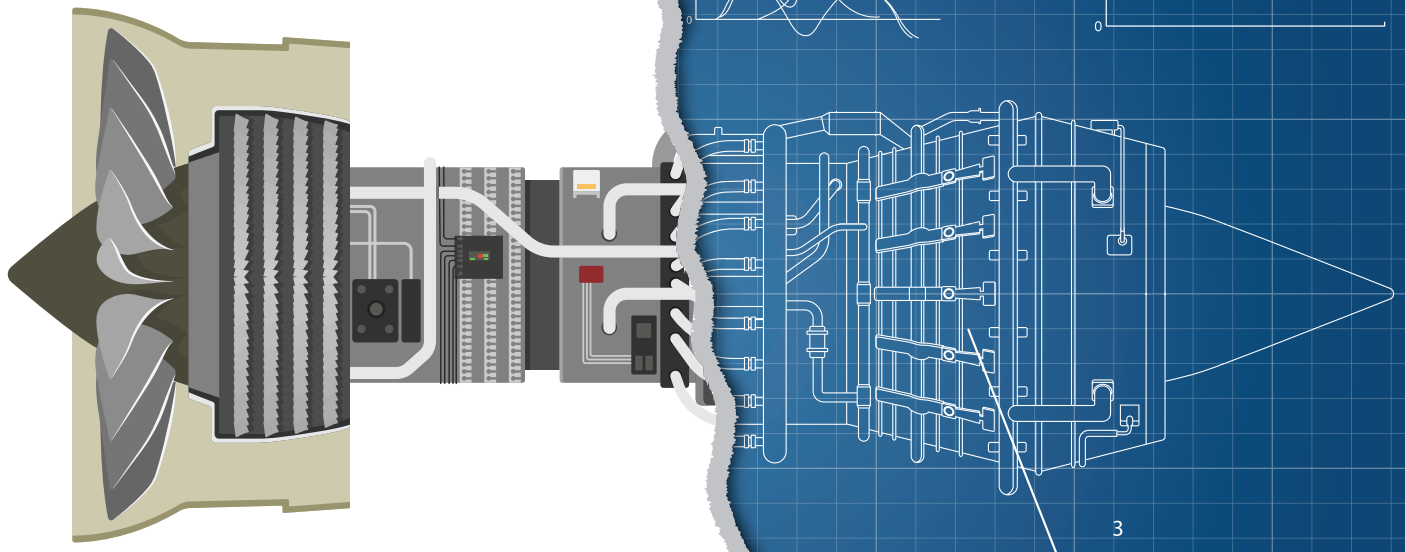

It's all in there
Maintenance, tech support, upgrades—**convertLogic** is everything you need in one package. Migrating to another version of ENOVIA? It's covered. We help you get **convert-Logic** up and working in no time. The Qore8 team is standing by to empower your creations and energize your work flows. We move with you and support your enterprise.

BOM management application
Our user-friendly, no programming experience required BOM application provides a framework to ensure consistency while reducing costs with quick and effective inventory management.

Metadata without limits, stamping your way
Add virtually any data or file as a permanent meta stamp to your document. Customizable data stamping with client-side administrative formatting is available.
