

# The Solidworks Collection

THE SMART, SECURE CORE OF DIGITAL TRANSFORMATION

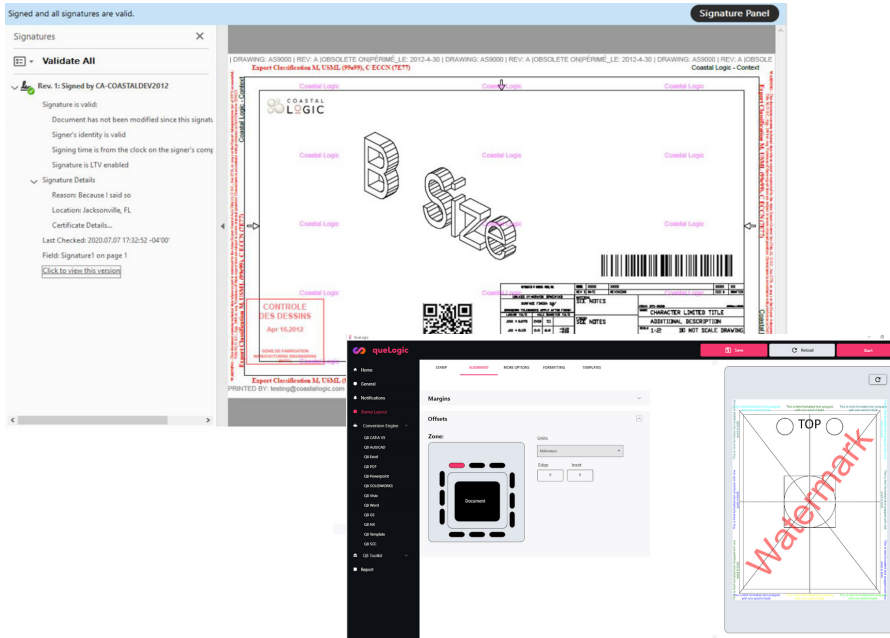

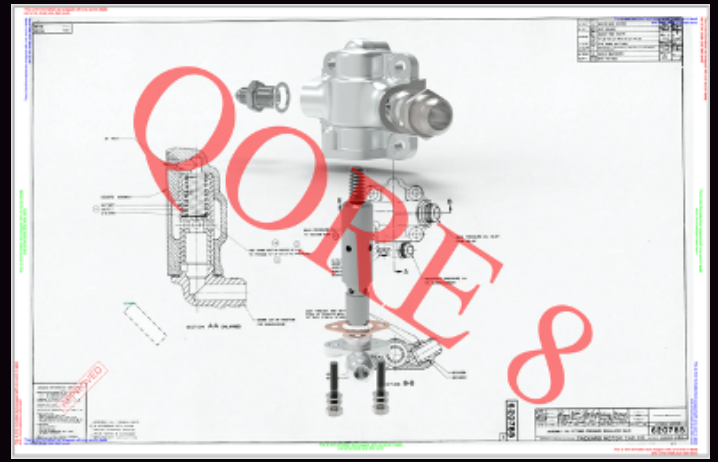

Qore8's Title Block Automation provides users the ability to carry forward SW custom properties to the design while applying additional compliance attributes.

# Business Tools

- Output of multiple drawings and associated parts
- Embedded reference objects
- Archiving of design history
- Aggregate additional files to create a document package

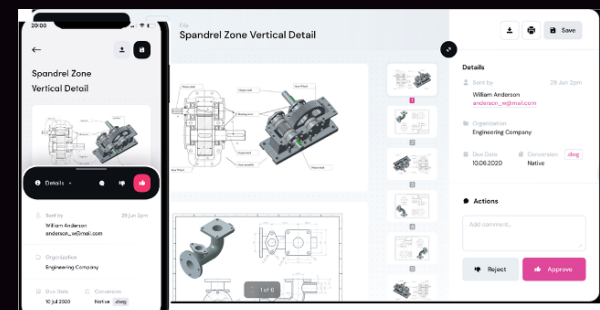

# Dynamic Stamping

- SW system properties captured on the drawing
- Stamped position configurable
- Font style, images, drawing identifiers, company logos, all highly configurable
- Maturity state captured
- Electronic and Digital Signature Capabilities

# Collaboration Tools

- Secure traceable sharing of digital assets
- Track revision history through the transmittal tool
- Archiving of design history
- Aggregate additional files, including native files, to create a document package
- Revisions can be made to a single document or an entire document package
- Stamped for protection
- Documents are timed stamped for audit purposes

Transmittals

34 903 Packages
