The DWO ollection

PDF and title block automation tool to fit your business process

www.qore8.com

# **How It Works**

qore8 offers customers the ability to automatically update
a SOLIDWORKS pdf design based on the customers
business process which does not originate from the
checkin of the drawing via SOLIDWORKS. Our qore8 Title
Block engine provides customers the ability to carry
forward SOLIDWORKS custom properties to the design all
while applying additional compliance attributes.

## Intellectual Property Protection

#### Qore8 package with stamping

- SW system properties captured on the drawing
- Stamped position configurable
- Font style, images, drawing identifiers, company logos, all highly configurable
- Maturity state captured
- Electronic and Digital Signature Capabilities

## Business Tool Automation

#### **Qore Conversion Package**

- Output of multiple drawings and associated parts Outputs include PDF, DWG, and DWF.....STEP, JT, IGES
- Embedded reference objects

Communication is a vital skill and fundamental to all relationships. Miscommunication leads to missed opportunities, loss of trust, and lack of accountability. Organizations have become increasingly complex, from systems to organizational structure. Staying hyper-connected with people, partnerships, and data that drive your business will drive the performance, growth, and supplier stability you expect.
